

Team Marvel

2nd Prize Winner of Swarnim Enigma E-Resolution Competition.

The Competition was conducted on 13th April 2020.

Following was our problem statement and Brief points of solution.

Problem statement:

For an design E-commerce company dealing with local handicrafts how to ensure that product is not infected and delivery can be done in time without the threat of COVID-19?

Solutions:

- Local handicraft makers would wear gloves and masks while making the product.
- All workers especially the delivery men are medically fit and not infected and daily temperature is checked.
- Product is double packaged.
- The outer package is a Cloth bag which the delivery man will remove before actually delivering it, after he sanitizes his hands.(The cloth bag is not actually disposed but brought back to firm is resanitized and reusable).
- Product is not HANDED to the consumer instead a tray is used to ensure minimal contact.
- Rider will maintain a physical distance of atleast 3 feet.
- Only Digital money is accepted and no COD option to ensure money doesn't act as a fomite.

Our Achievements:

- ★ We are being incubated at Swarnim Incubation Center and proper guidance was provided to us for working of our startup project.
- ★ Prototype fund will be provided to us of Rs. 1,00,000.
